

Bubble Sort

1. Look at the people before you and start to **your left**
2. Compare the **height** of the **first two persons**, if the left person is taller, swap their positions
3. Continue with the **second and third** persons, swap them if the left person is taller than the right
4. **Continue** the same way until you reach the **last person**
5. **Repeat from the beginning** until you do not have to swap any persons

Now all persons are ordered by height!
