

Scenario - Robot Butler

- It can do everything a human can do
 - Help with chores, homework, gardening, ...
 - You are its owner / master
 - Reacts on its own following your commands
 - **Needs rules on how to behave...**
- ... so it does not do anything wrong or harmful by accident

Leading Questions

Should the robot be allowed to...

... **help** with your **homework**?

... **defend** against intruders?

... **activate itself** in case of an emergency?

... **leave** your home?

...

Loopholes

- Do the rules prevent it from **doing your homework**? Even when you ask it step by step?
- **Who defines** what an **intruder** is? Could it be used to attack another home by redefining/faking ownership?
- Can it turn **immune to deactivation** in case of dangerous behaviour, based on the definition of an emergency? How is an emergency defined?
