

## How Intelligent Is Mitsuku?

Steve Worswick's Mitsuku (Nickname "Kuki") is an apparently 20 year old chatbot and was subjected to the Turing test in a competition.

Mitsuku was asked 20 questions, some you can find in the table below.

**Read the questions and their answers carefully.**

**In partner work, discuss how "human" the different ones are for you**

Answers are, and give points for each answer:

0 points - for a completely inappropriate, non-human answer

1 point - for a nondescript answer like "I don't know" or similar

2 points - for answers as one might expect them from humans

Question	Answer	Your Rating
